

Important Message from Superintendent Space  
Public Statement:

The Pulaski School Community District is aware of negative publicity directed at a teacher in the District, fueled by those who oppose this individual's personal life choices. The District has obtained no evidence to support the statements that the teacher has engaged in any "grooming" behavior, nor have we obtained any evidence that the teacher has directed students to any social media sites the teacher maintains. Likewise, there is no evidence that the teacher has created or distributed pornography of any type to any students or within the school community in any capacity. Nor is there any evidence that the teacher has been involved in the creation or distribution of pornography in any context. Teachers are entitled to their personal lives and provided that those personal lives do not impact the teacher's ability to perform the job and do not pose any safety concerns for the students, it is not the District's place to dictate personal behavior that is lawful and unrelated to one's duties as a teacher.

District officials are greatly concerned by the disturbing communications we are receiving that contain fabricated assertions of grooming behavior and false allegations that kids have been exposed to pornography. To reiterate, there is no evidence of any of this alleged behavior. More concerning still are those who feel empowered by false information to make threats against the safety of school officials and employees. That type of behavior is irresponsible and harmful to District staff and students. As always, the District's primary concern is for the safety of students and staff in the educational environment. That will continue to be our focus.
