LET'S TALK GRIEF: SUPPORTING CHILDREN AND TEENS

In Wisconsin, 1 in 14 children will experience the death of a parent or sibling by the age of 18 (Jag Institute, 2022). The impact of grief and loss is far reaching and can affect a child or teen emotionally, physically, behaviorally, and academically. Grief can be difficult to understand and uncomfortable to discuss. Join in an honest and open conversation with the Unity Grief and Education Center to learn how children and teens respond to grief, discover ways to extend support, and learn what resources are available in our community.
