

PULASKI

COMMUNITY SCHOOL DISTRICT

RAIDER ROADMAP 2021-2022

SAFETY AND LEARNING GOALS

In-person instruction for school-aged children and adolescents is a priority for the 2021-2022 school year.

COMMUNICATION

This plan may change throughout the year based on recommendations from health advisors. We will continue to tighten the protocols as the need arises. We will continue to monitor these recommendations and local data to determine if/when the district needs to re-evaluate.

MEDICAL ADVISEMENT

The district medical advisor serves as a consultant in the prevention, identification, and control of communicable disease, and provides guidance to student health services, the district superintendent, and the school board, to inform decisions related to school planning and best health/safety practices.

HEALTH ROOM AND ISOLATION PROCEDURES

Students presenting with viral symptoms will be asked to wear a face covering and will be isolated until they can be picked up or are able to leave school.

THINGS TO REMEMBER

- The safest practice is to wear a mask.
- Masks are required on all public transportation provided by the district as this [Federal mandate](#) is still in effect. If you are riding our buses your child will be expected to wear a face covering.
- COVID vaccination information is available [here](#). PCSD will not be providing vaccination clinics within the district.
- COVID-19 Testing information can be found [here](#). PCSD also will not be testing on-site in the district.
- The COVID Hotline (920-822-6003) will continue to be monitored. Please report any COVID-19 related illness or questions.

We urge ALL parents to follow this guidance and recommendations to ensure the health and safety of students, teachers, and school staff, as well as the broader Pulaski community.

LEARNING OPTIONS

- In-person learning (face to face)
- Grades 6-12 e-Kiel/ Between the Lakes virtual (registration deadline has passed and slots are full)
- Individualized learning plans if in quarantine (example: similar to medical absences).

The PCSD offers free hotspot access for families who need Wi-Fi access. Please call the Technology Department at (920) 822-6070 to request one.

FACE COVERINGS

Face coverings slow the spread of the COVID-19 and help people who may have the virus from spreading it to others. PCSD strongly encourages students, teachers, staff and visitors to wear masks indoors, regardless of vaccination status. (The U.S. Center for Disease Control (CDC) recommends everyone 5 years old and older get a COVID-19 vaccination.) The District requests the assistance of all parents to reinforce with students that individual family choice on the use of face coverings is to be respected. **Harassment or bullying related to masking choice will not be tolerated.**

RAIDER ROADMAP 2021-2022

EXPOSURE PROTOCOL

The [exposure protocol](#) has been adjusted to track positives, symptomatic, and household contacts only, at this time. Families will receive a low-risk level exposure letter as information only. Parents are asked to monitor their child daily for symptoms when receiving this low-level exposure letter. Students are to stay home when sick or symptomatic, and families are to report positive COVID cases to their building. Household close contacts will continue following the exposure protocol.

STAY HOME, GET TESTED WHEN SICK

Students and staff who are experiencing symptoms of illness should stay home from school for at least 24 hours after all symptoms subside. If experiencing symptoms of COVID-19, it is recommended to get tested for COVID-19, regardless of vaccination status. Students and staff should monitor themselves for symptoms of infectious illness every day before attending school.

MITIGATION

PCSD promotes layered mitigation strategies to prevent the spread of COVID-19. This includes ventilation, handwashing, respiratory etiquette, cleaning, and disinfection.

HANDWASHING: The district will continue to promote hand hygiene by placing visual cues such as handwashing posters and other materials in highly visible areas. Hand sanitizer will be available in school entrances and high traffic areas. Washing your hands is easy, and it's one of the most effective ways to prevent the spread of germs. Clean hands can stop germs from spreading from one person to another and throughout the entire school community.

SOCIAL DISTANCING: We will continue to social distance the best we can in various settings when feasible, and avoiding large groups of students in indoor spaces will continue. We will take advantage of nice weather, teachers to conduct instructional activities outdoors whenever possible.

SANITATION AND VENTILATION

- Buildings are cleaned and disinfected nightly
- Outside air is being introduced into all spaces within the buildings along with increased filter ratings
- Hand sanitizer will be available in every classroom and throughout common spaces
- High-touch surfaces disinfected daily
